

UnitedHealthcare Pharmacy
Clinical Pharmacy Programs

Program Number	2019 P 3063-7
Program	Step Therapy
Medication	Uloric (febuxostat)
P&T Approval Date	8/2015, 7/2016, 7/2017, 7/2018, 7/2019
Effective Date	10/1/2019; Oxford only: 10/1/2019

1. Background:

Uloric is a xanthine oxidase (XO) inhibitor indicated for the chronic management of hyperuricemia in patients with gout who have an inadequate response to a maximally titrated dose of allopurinol, who are intolerant to allopurinol, or for whom treatment with allopurinol is not advisable. Uloric is not recommended for the treatment of asymptomatic hyperuricemia.

Step Therapy programs are utilized to encourage the use of lower cost alternatives for certain therapeutic classes. This program requires a member to try allopurinol before providing coverage for Uloric. Members, who have received at least a 90 day supply of Uloric in the past 120 days as documented in claims history, will be allowed continued coverage of their current therapy.

2. Coverage Criteria^a:

<p>A. Uloric will be approved based on the following criterion:</p> <ol style="list-style-type: none"> 1. History of failure, contraindication or intolerance to the following: <ol style="list-style-type: none"> a. allopurinol (generic Zyloprim) <p style="text-align: center;">Authorization will be issued for 12 months.</p> <p>^a State mandates may apply. Any federal regulatory requirements and the member specific benefit plan coverage may also impact coverage criteria. Other policies and utilization management programs may apply.</p>

3. Additional Clinical Rules:

- Notwithstanding Coverage Criteria, UnitedHealthcare may approve initial and re-authorization based solely on previous claim/medication history, diagnosis codes (ICD-10) and/or claim logic. Use of automated approval and re-approval processes varies by program and/or therapeutic class.
- Supply limits may apply
